

WE BUILD SOFTWARE

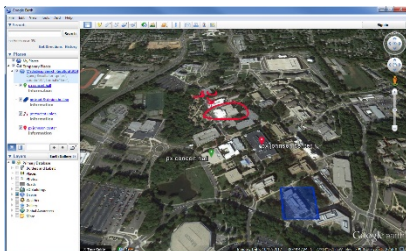

Product Lineup

RackBrains ::Cloud Brainstorming & Collaboration::

Provides cloud hosted, interactive brainstorming and collaboration. Setup your group and drive your users through ideation and data collection, categorization, and voting. Useful for new product brainstorming, proposal response idea categorization, or backlog generation and lightweight sprint planning.

BlackBird ::Photo Timeline System::

Drag multiple images to the drop zone and BlackBird will create a pictorial Timeline of not only where the pictures were taken but when.

Talon ::Make Your Mark::

Map based tools that are accessible through a mobile device without the requirement of a constant network connection.
